I operate across product, technology, growth, and operations to build products that consumers love. For over 20 years I've built and scaled consumer products, subscription businesses, streaming platforms, and the organizations behind them. I've served as COO, President, General Manager, Chief Product Officer, and Advisor, leading teams of up to 165 and businesses inside organizations generating more than $1B a year. My career has been spent moving between strategy and execution: leading teams, building products, running businesses, and turning ambiguity into clarity and action.

HERE'S WHAT I BELIEVE

Growth is the byproduct of a brand with a clear vision that keeps its promises.

Understand the role your audience needs you to play in their lives, then build the whole company around delivering on that promise, over and over. Every kept promise deepens trust and strengthens the relationship. Every broken one takes you back to square one.
